DEEP DIVE VISIT

1

THEMES

Structure of the CCI

Screening & Early Detection

Patient Pathways

The first deep dive (25-27 Nov 2024) in Bulgaria, hosted by St. Ivan Rilski University Hospital, focused on three key themes: Structure of the CCI, Screening and Early Detection, and Patient Pathways.

The event brought together stakeholders from hospitals, healthcare, IT, and government sectors, including the Ministry of Health and private entities. The collaboration aimed to identify opportunities for improving cancer care outcomes through sustainable solutions and digital integration in multidisciplinary care. Challenges include personalizing care pathways while ensuring precision, efficiency, and accessibility for both patients and providers.

The initiative seeks to bridge gaps in Bulgaria's cancer care system, which currently lacks effective screening programs and faces challenges in accessibility and affordability of cancer services. The second deep dive is scheduled for March 25-27, 2025.

Key Themes

The CCI4EU Deep Dive Bulgaria focuses on three priority themes:

Structure of the CCI

Screening & Early Detection

Patient Pathways
