## THEMES

Research

Patient Pathways

Structure of the CCI

On 25-26 November 2024, the Masaryk Oncology Institute (MOÚ) in Brno hosted a meeting opened by the OECI team and MOÚ representatives.

Stakeholder presentations were well-received, and participants engaged in discussions on the development of the emerging network.

Following the opening session, stakeholders were divided into three thematic groups—Research, Patient Pathway, and CCI Structure—for in-depth discussions facilitated by OECI members. The second day focused on identifying strengths and weaknesses within the network, followed by a visit to SIMU at the Faculty of Medicine, Masaryk University.

The visit provided valuable insights and recommendations from OECI experts, contributing to the identification of key areas for improvement and the development of tailored solutions. The expertise and constructive feedback shared during the discussions will play a critical role in enhancing the quality of cancer care in the South Moravian Region.

# Key Themes

The CCI4EU Deep Dive Czech Republic focuses on three priority themes:

Research

Patient Pathways

Structure of the CCI
