DEEP DIVE VISIT

1

THEMES

Structure of the CCI
Clinical Research
Patient Pathways

On November 11th and 12th, 2024, CCI-Ireland welcomed its first CCI4EU expert team visit.

Nearly 25 institutions participated, including eight cancer centres (along with academic partner institutions), the National Cancer Control Programme, the National Cancer Registry of Ireland, the National Screening Service, St. Luke's Radiation Oncology Network, Cancer Trials Ireland, the Health Research Board, the Irish Pharmaceutical Healthcare Association, the Department of Health, cancer charities, and patient representatives.

Bringing together institutions involved in cancer care and research to engage with the CCI4EU expert team provided valuable insights. The initiative will continue in 2025, supporting further collaboration and progress.

Key Themes

The CCI4EU Deep Dive Ireland focuses on three priority themes:

Governance and Structure

Clinical Research

Patient Pathways

Action Plan

Within the priority areas, selected actions focus on:

Formalising the participation of CCI entities

Defining rules of procedure and the functions of the coordination point/board

Harmonising local and national pathways

Strengthening data sharing between cancer centres
