DEEP DIVE VISIT

1

THEMES

**Interfaces, Discovery &
Translational Research,
Outcomes Research**

During the first week of December 2024, a team of experts conducted a Deep Dive into the Slovak oncological landscape.

The National Oncology Institute in Bratislava served as the leading and hosting institution, bringing together key stakeholders from across the country, particularly from the Banská Bystrica and Košice regions.

Over two intensive days of presentations and discussions, representatives from engaged institutions and hospitals provided an overview of the current state of oncological care in Slovakia.

In addition to structured discussions, the expert team visited select institutions, including the Ministry of Health. The visit culminated in a SWOT analysis, guiding stakeholders in defining SMART objectives as part of a structured working plan for the near future.

Key Themes

The visit focused on three key topics:

Comprehensive Cancer Infrastructure

Comprehensive Cancer Centre

Patient Pathways, with a specific focus on the Breast Cancer Patient Pathway
